

Have you recovered from COVID-19?

LIFESOUTH
Community Blood Centers

Your plasma can help save lives!

LifeSouth partners with medical centers in Florida, Georgia and Alabama to collect plasma from COVID-19 patients who have recovered from the virus.

Convalescent plasma is a term for plasma taken from a donor who has recovered from a disease. Plasma is the liquid portion of blood where antibodies reside. Some research suggests that transfusing plasma with preformed antibodies against COVID-19 may help speed recovery and prevent mortality in those critically ill with COVID-19.

If you are interested in donating convalescent plasma, please visit [lifesouth.org](https://www.lifesouth.org) to make an appointment to donate or call 888-795-2707.

At your donation appointment, please let the LifeSouth staff know you are donating convalescent plasma.
